

Intro: Instrumental]

Together on the road, that's where it all began,  
with joy, with the very first "hello" at the meeting point.  
So many faces, so many characters,  
each with their own path and goal.

[Verse 1]

We traveled together through cities and across the land,  
took turns and faced obstacles.  
With every meter, every drive,  
trust kept growing more and more, day by day.

[Pre-Chorus]

You believed in it, you held on,  
with humor, patience, and determination.  
And we saw how every single step  
helped build your confidence.

[Chorus]

Thank you all for every laugh,  
every drive, for every effort,  
every hour that we spent together.

For a year full of learning moments, success, patience, and team spirit.

[Verse 2]

I'm proud of every drive  
that you completed – step by step.  
Swiss Driving School wishes you all the best,  
on every road that now follows, safely and with confidence.

[Bridge]

We keep driving through this life,  
just like it's been so far – wonderful.  
We had rain, snow, and sunshine,  
experienced traffic jams and kept our calm.

[Chorus]

Thank you all for every laugh,  
every drive, for every effort,  
every hour that we spent together.  
For a year full of learning moments, success, patience, and team spirit.

[Outro]

Here's to 2026 – with happiness, success, and calm,  
and many accident-free kilometers ahead –  
for each and every one of us, together.

So once again: thank you so much for your trust and your time.
